Maitland Academy
"Exceptional education to nurture whole body/mind development"

Maitland Academy is dedicated to providing an education rich in sensory integration to nurture whole body/whole mind development. Our goal as parents, educators, and therapists is to develop an individualized curriculum for each child combining Sunshine State Common Core Standards, speech and occupational therapies, along with behavioral supports delivered within small group and 1:1 instruction in a safe, nurturing, and structured environment.

We provide a sensory rich education for students with varying special needs; grades K-12 and ages 5-18.

Each student receives an education that combines individualized curricula and instructional methodologies with hands on learning and an integrated sensory diet. Each student's curricula is tailored to their individual strengths, abilities, and areas that present additional challenges.

140 Tonina Cove • Suite 150 • Maitland, FL 32751
(407)599-5777 • admin@maitlandacademy.net

"As the mother of 2 children with autism, life is definitely easier thanks to CARD. From the very beginning of our journey through autism, CARD has educated and empowered us. They have provided support in so many ways: education & training, support group meetings, community resources, behavior strategies, advocacy in the school system and so much more.

CARD has been an invaluable resource to our family and I recommend getting involved with them as soon as possible. They will help you navigate the present and plan for the future of your special needs child."

Robin Evans

CARD serves children and adults of all ages and abilities who have an autism spectrum disorder including:

Autism, Asperger's Disorder, Childhood Disintegrative Disorder, Rett's Disorder, Pervasive Developmental Disorder-Not Other-wise Specified, Dual sensory impairment, sensory impairment with other developmental disabilities.

Program enhancement by PALS a 501C3 for UCF CARD.

UCP of Central Florida
Education • Therapy • Support

At UCP of Central Florida, we believe every child deserves excellent academics to help them learn, grow and excel. Our research-based academics lay the foundation for each student's future success. By opening our classrooms to children with and without special needs in a unique education model called inclusion, not only are we breaking down barriers but we are teaching children at a very young age to embrace differences. Our unique education approach promotes a valuable skill set that creates stronger, more open leaders in the future.

Education

- A tuition-free public charter school and free for other eligible students through a variety of funding sources including 4C, Early Steps and VPK
- Infant, Toddler and Pre-K through 5th grade inclusive charter schools
- Transitional Learning Academy for middle and high school students with disabilities
- College/Career Transition Program for young adults ages 18 to 21 with disabilities
- Low student-teacher ratios
- Before and after-school care available
- Summer enrichment and camp programs

Therapy

- Physical, speech and Occupational Therapy available during school or before/after school. Medicaid, commercial insurance and private/prompt pay options
- Private/prompt rate is $45 per 30 minute session.

Support

- Individual and family counseling
- Support groups for parents and siblings

Snoring in children is not normal.

The American Academy of Pediatrics recommends that snoring be discussed at all office visits.

- If your child snores, talk to your physician about it. IT IS NOT NORMAL.
- If your child has mood problems, ADHD/ADD symptoms or poor school grades talk to your physician, snoring may be contributing to the problem.
- If your child is a restless sleeper or has difficulty maintaining sleep then talk to your physician, that is not normal.

Snoring in children can be associated with:

- Sleep apnea (stops breathing in sleep).
- Restlessness and non-restful sleep in children.
- Behavioral problems such as ADHD, learning disabilities, poor school performance and mood disorders in children.
- Children with snoring and poor sleep may be misdiagnosed with behavioral problems like ADHD.
